Event: Placement Panel Session

One of the panel sessions conducted by Codecell in the month of March was the placements panel session. This placement session helped clear various common doubts and questions that arise regarding placements. It was a stage where students could also ask their doubts to our panelist regarding placements. There were four panellists in this event - Chirag Shetty, Dipen Ved, Chaitya Shah and Smit Thakkar. They were former Codecell members and are happily placed in top companies like BrowserStack, Microsoft and Forbes Advisor. They gave various insights regarding placements and the worklife after placements. They discussed how the pandemic affected the IT industry and hence the placements. This event was hosted on Google meet and was streamed on YouTube, hence it could benefit students of other colleges as well. Different types of questions from various topics were asked by the host and the panellist replied to those questions enthusiastically, gave their views and also shared their experiences. After all the questions were answered, viewers were allowed to join the Google meet and asked questions they wished to ask regarding placements. They all got their doubts cleared individually. Even the panelist enjoyed the event and cleared all the doubts patiently. Not only they cleared doubts but also gave useful tips and tricks to follow before attending interviews. Overall the event was a success as it benefited a lot of students.
